

Trusted Document Management

DLT solutions eliminating paper

SEND STORE SIGN SHARE immutable documents with minimal administration

Elimination of paper and reduction of cost and complexity with a highly secure and regulatory compliant solution

Billon's mission is to unleash the transformational capabilities of DLT with a high-performance system for Trusted Document Management.

Send

Confidential and provable business communication for public and private documents

Store

Decentralized "on-chain" and immutable documents and data

Sign

E-signature on contracts linked to validated identity on ledger

Share

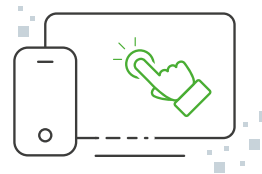

Secure data exchange of one source of truth, with verifiable record of the provenance, access and usage

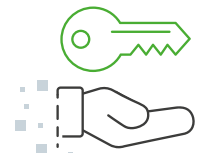

Ultimate evidence of **proof of delivery** and guaranteed real-time confirmation

Immutability, integrity & authenticity of data and documents

Simple "one - click" mobile or web app for consumers

Irrefutable owner revision control with **built-in audit trail**

Capabilities

Nodes

- Automated document import via APIs
- Mass publication
- Cloud hosting options
- Customizable notification services
- Light nodes can operate on portable devices

Documents

- Decentralized on-chain storage
- Document persistence control
- Document version comparison
- Active delivery attributes
- Remote signature linked to identity
- Irrevocable timestamping

Governance

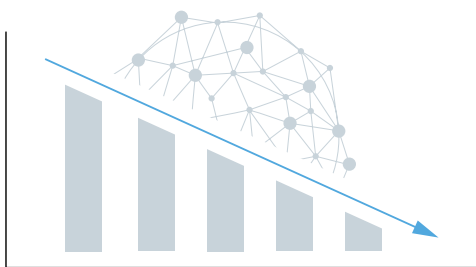

- Regulatory compliance for GDPR and durable medium
- Full support to user driven execution of the right to be forgotten
- Access rights controls
- Multi-keys atomic data encryption

Benefits

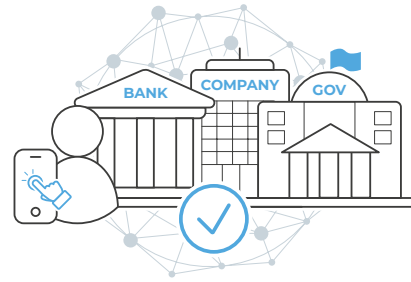

Billon's DLT is specifically designed to deliver tangible business savings, eliminating the risk of document security, and to support new revenue streams.

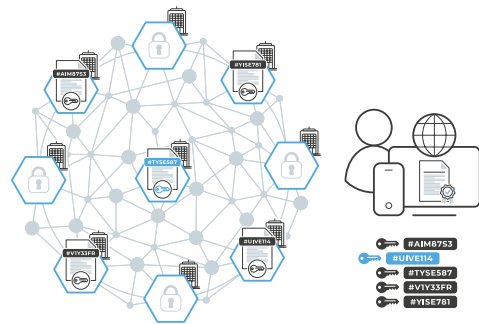

One complete enterprise - grade solution for digital data & document management reducing **time and costs**.

Reduces cost of IT infrastructure for better storage, backup, replication, and disaster recovery.

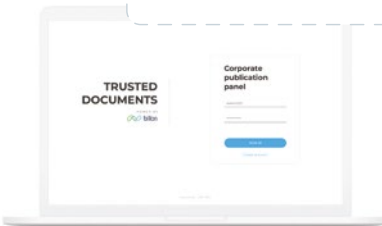

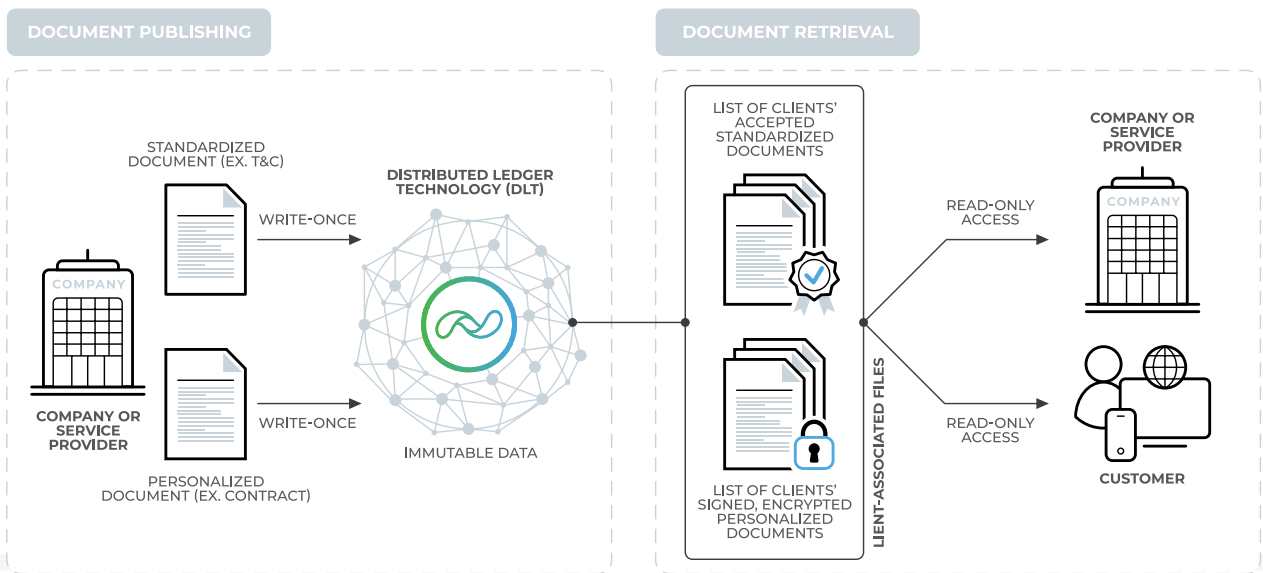

Fulfills regulatory requirements for MIFID II (durable medium) and GDPR – enabling identity protection and the right to be forgotten.

Maximizes data security with minimal IT administrative costs as clients manage own keys integrated into own devices.

Highly scalable, fast and flexible with easy API integration.

WEB PUBLICATION

USER-FRIENDLY INTERFACE FOR UPLOADING, MANAGING AND MONITORING ANY DOCUMENTS

MOBILE APP & WEB READER

TRACK AND MANAGE DOCUMENTS WITH A SMARTPHONE AND INTERNET CONNECTION
